CONTENTS

NUMBER 1, JANUARY

1 Preface: Professor A. L. A. Boura
J. O'Neil and J. Olley

3 Autacoids affecting vascular tone in the human fetal extracorporeal circulation
W. A. W. Walters

9 Cardiovascular sensitivity changes to eicosanoids in rats with experimentally induced diabetes mellitus
W. C. Hodgson, B. W. Sikorski and R. G. King

17 Chemical design of peripherally acting compounds
W. R. Jackson, F. C. Copp, J. D. Cullen, F. J. Guyett, I. D. Rae, A. J. Robinson, H. Pothoulackis, A. K. Serelis and M. Wong

25 Pharmacological evaluation of two novel analogues of mianserin: 2-*N*-carboxamidinonormianserin (FCC5) and 2-*N*-carboxamidonormianserin (FCC13)
I. M. Leitch, A. Rawlow and M. P. Rechtman

31 Sensory nerves in the airways as a target for drug development
M. P. Rechtman

41 The evolution of hypertensive therapy
R. D. Robson

47 Buprenorphine and gastrointestinal transit in rats: Effect of naloxone on the biphasic dose–response curve
A. Cowan

51 An industrial approach to drug discovery: A pharmacologist's eyeview
J. M. Armstrong and P. E. Hicks

57 Government initiatives in the development of a pharmaceutical industry in Australia
C. A. Hirst

63 AMRAD: The first 4 years
J. P. Grace

67 Symbiotic relationship between a research institute and a pharmaceutical company: The Baker Institute/Glaxo Australia story
J. A. Angus

73 $GABA_A$ agonists as targets for drug development
G. A. R. Johnston

NUMBER 2, FEBRUARY

79 Relationship between ATP resynthesis and calcium accumulation in the reperfused rat heart
Y. Hasin, M. M. Kneen, D. J. Craik and W. G. Nayler

89 Antagonism by endothelin of centrally mediated cardiovascular effects of potassium in anaesthetized rats
J. Shah and B. S. Jandhyala

95 Impedance measurement during air and helium–oxygen breathing before and after Salbutamol in COPD patients
E. F. M. Wouters, F. J. Landser, A. H. Polko and B. F. Visser

103 Activation of noradrenergic and nitrergic mechanisms in the rat anococcygeus muscle by nicotine
M. J. Rand and C. G. Li

113 Plasma phospholipase A_2 activity in clinical acute myocardial infarction
L. L. L. Leong, M. J. Sturm, Y. Ismail, C. J. Stephens and R. R. Taylor

119 Superoxide dismutase attenuated post-ischaemic contractile dysfunction in a myocardial xanthine oxidase deficient species
H. Ooiwa, T. Miura, T. Iwamoto, T. Ogawa, R. Ishimoto, T. Adachi and O. Iimura

127 Repetitive electrical activity of the muscle membrane induced in chloride-free medium
P. P. Nánási and M. Dankó

137 Blood serum biochemical changes in physically conditioned and unconditioned subjects during bed rest and chronic hyperhydration
Y. G. Zorbas, K. A. Naexu and Y. F. Federenko

NUMBER 3, MARCH

147 Review Article
Nitrergic transmission: Nitric oxide as a mediator of non-adrenergic, non-cholinergic neuro-effector transmission
M. J. Rand

171 Increased Na^+/H^+ exchange activity in vascular smooth muscle cells of spontaneously hypertensive rats and possible involvement of protein kinase C
H. Inariba, Y. Kanayama, K. Takaori, N. Negoro, T. Inoue and T. Takeda

177 Fish oil feeding selectively attenuates contractile responses to noradrenaline and electrical stimulation in the perfused mesenteric resistance vessels of spontaneously hypertensive rats
Z. M. Chu, K. Yin and L. J. Beilin

183 Propofol anaesthesia in malignant hyperpyrexia susceptible swine
P. S. Foster, K. C. Hopkinson and M. A. Denborough

187 Cardiovascular habituation to emotional stress in Lyon hypertensive rats
C. Julien, J. Sacquet, P. Kandza, D-F. Su, M. Vincent and C. Barres

193 Atrial and brain natriuretic peptides: Secretion during exercise in patients with essential hypertension and modulation by acute angiotensin-converting enzyme inhibition
M. Kohno, T. Horio, K. Yokokawa, K. Murakawa, K. Yasunari, N. Kurihara and T. Takeda

201 Renal handling of endogenous lithium in experimental diabetes mellitus in the rat
C. A. Pollock and M. J. Field

209 Obituary: Professor K. P. Bhargava

NUMBER 4, APRIL

213 Regulation of proximal tubule function by angiotensin
P. J. Harris

223 Inhibitory effect of neuropeptide Y on stimulated renin secretion of awake rats
J-F. Aubert, P. Walker, E. Grouzmann, J. Nussberger, H. R. Brunner and B. Waeber

229 Failure of the nitrous oxide tissue equilibration method for the determination of brain and myocardial blood flow under controlled conditions
M. A. Reid, W. B. Runciman, C. F. McLean and L. E. Mather

235 Sodium and noradrenaline in cerebrospinal fluid and blood in salt-sensitive and non-salt-sensitive essential hypertension
Y. Kawano, K. Yoshida, M. Kawamura, H. Yoshimi, T. Ashida, H. Abe, M. Imanishi, G. Kimura, S. Kojima, M. Kuramochi and T. Omae

243 Potassium channel activation improves blood flow pattern of conscious rats in cutaneous microcirculation
R. F. Hertel

249 Time course of regional flow distribution following reperfusion of the isolated ischaemic rat heart
P-O. Sjöquist, T. Abrahamsson and M. H. Johansson

253 Isolation and characterization of the rat liver AVP receptor using [^{125}I][d(CH_2)$_5$,Sarcosine^7]AVP^1
D. Trinder, J. M. Kelly, R. Fernley, V. Mooser, P. A. Phillips and C. I. Johnston

261 Increased sensitivity to endothelin-1 in isolated Krebs'-perfused kidneys of streptozotocin-diabetic rats
P. J. Tammesild, W. C. Hodgson and R. G. King

267 Measurement and identification of prorenin and renin in ovarian follicular fluid from cattle and pig
A. Hagemann, A. H. Neilson, V. Dantzer, B. Avery, K. Poulsen

275 Letters to the Editor

NUMBER 5, MAY

Short Communications from the High Blood Pressure Research Council of Australia

279 Enalapril decreases plasma noradrenaline levels during the cold pressor test in human hypertensives
S. Minatoguchi, H. Ito, M. Koshiji, K. Masao, S. Hirakawa and H. Majewski

283 Inappropriately elevated levels of atrial natriuretic peptide may contribute to the pathophysiology of orthostatic hypotension
T. J. Tunny, R. D. Gordon, S. A. Klemm, A. W. Bachmann and W. L. Finn

287 Effects of repeated doses of pseudoephedrine on blood pressure and plasma catecholamines in normal subjects and in patients with phaeochromocytoma
R. D. Gordon, D. M. Ballantine and A. W. Bachmann

291 Is isolated systolic hypertension a 'white coat' phenomenon in the elderly?
C. A. Silagy, J. J. McNeil, B. P. McGrath and S. Farish

294 Sample size requirements for clinical trials of isolated systolic hypertension
C. A. Silagy, J. J. McNeil and B. P. McGrath

297 Increase in serum total angiotension-converting enzyme activity with enalapril therapy in humans: A controlled trial
G. S. Stokes, J. C. Monaghan, J. F. Marwood, E. Obi Okoro and H. Johnston

300 Concurrence of primary aldosteronism and renal artery stenosis
G. S. Stokes, J. C. Monaghan, J. Roche, H. Grunstein and R. D. Gordon

304 Inaccuracy of electronic sphygmomanometers
S. Mann

307 Subpressor calcium infusion increases isovolumic left ventricular relaxation time and atrial natriuretic peptide in humans
W. L. Finn, R. D. Gordon, B. I. Seneviratne, T. J. Tunny and S. A. Klemm

311 Evidence for presynaptic β-adrenoceptor stimulation 24 hours after a 6 hour adrenaline infusion
A. W. Bachmann, R. D. Gordon and D. M. Ballantine

315 Polymorphisms of candidate genes in essential hypertension
M. J. West, K. M. Summers and P. R. Huggard

319 Familial hyperaldosteronism type II: Five families with a new variety of primary aldosteronism
M. Stowasser, R. D. Gordon, T. J. Tunny, S. A. Klemm, W. L. Finn and A. L. Krek

323 Prostaglandins and systolic blood pressure, but not angiotensin II, independently affect atrial natriuretic peptide levels in humans
S. A. Klemm, R. D. Gordon, T. J. Tunny, W. L. Finn and A. Hornych

327 Population-based survey of human sodium and potassium excretion
T. C. Beard, R. Eickhoff, Z. A. Mejglo, M. Jones, S. A. Bennett and T. Dwyer

331 Effects of argininosuccinic acid on nitric oxide-mediated relaxations in rat aorta and anococcygeus muscle
M. J. Rand and C. G. Li

335 Axonal projections from respiratory centres towards the rostral ventrolateral medulla in the rat
P. Pilowsky, B. Wakefield, J. Minson, I. Llewellyn-Smith and J. Chalmers

339 Haemodynamic changes in the Moncada model of atherosclerosis
A. C. Yong, G. Townley and G. W. Boyd

343 Mesenteric vascular angiotensin-converting enzyme is increased in experimental diabetes mellitus
K. Jandeleit, J. Rumble, B. Jackson and M. E. Cooper

348 Mesenteric resistance and brain microvascular angiotensin-converting enzyme in the spontaneously hypertensive rat
K. Jandeleit, R. Perich, B. Jackson and C. I. Johnston

353 Variation in angiotensin-converting enzyme inhibitor affinity at two binding sites on rat pulmonary ACE: Influence on bradykinin hydrolysis
R. B. Perich, B. Jackson and C. I. Johnston

358 Polymerase chain reaction-based DNA fingerprinting in the spontaneously hypertensive rat: Potential source of cDNA library probes
R. Di Nicolantonio, T. Imai, K. Ikeda, M. Sawamura, Y. Yamori and K. Murakami

361 Development and validation of echocardiographic methods for estimating left ventricular mass in rats
E. F. Jones, S. B. Harrap, P. Calafiore and A. M. Tonkin

365 The heterogeneity of 11β-hydroxysteroid dehydrogenase activities in the rat hippocampus implies a complex regulation of steroid hormone action
R. E. Smith, W. R. Mercer, P. H. Provencher, V. Obeyesekere and Z. S. Krozowski

369 DA-1 receptors mediate renal effects of the dopamine prodrug, gludopa, in conscious rabbits
Z-Q. Wang, D. Way, L. Trigg and B. P. McGrath

373 Effect of enalapril on body sodium and handling of a sodium chloride load in hypertensive and normotensive rats
J. M. Ledingham and F. O. Simpson

376 Renal vasoconstriction is modulated by nitric oxide
J. J. Reid and M. J. Rand

380 Effect of neutral endopeptidase inhibitor in rats with congestive heart failure
Y. Murohara and C. I. Johnston

384 Interaction between vasopressin and endothelin in renal papillary tubules: Uncoupling following cell isolation and culture
E. A. Woodcock and S. Land

388 Isolation of adult cardiomyocytes initiates a return of inositol trisphosphate phosphorylating activity
E. A. Woodcock and K. Anderson

392 Long-term angiotensin II antagonism in spontaneously hypertensive rats: Effects on blood pressure and cardiovascular amplifiers
C. J. Oddie, R. J. Dilley and A. Bobik

396 Differential regulation by transforming growth factor-β_1 of platelet-derived growth factor-simulated proliferation of vascular smooth muscle cells from SHR and WKY rats
J. Saltis, A. Agrotis and A. Bobik

NUMBER 6, JUNE

401 Endothelium-dependent and -independent relaxation by dopamine in the rabbit pulmonary artery
M. Yamauchi, Y. Kobayashi, K. Shimoura, K. Hattori and A. Nakase

411 Ranitidine inhibits adrenergic transmission in the rat isolated anococcygeus muscle
M. C. E. Gwee and L. S. Cheah

415 Neurovascular function during pregnancy in the spontaneously hypertensive rat
E. M. Yong, M. T. Mano and R. J. Head

425 Cardiac effects of local angiotensin-converting enzyme inhibition in hypertensive patients
Y. Nakashima, T. Nii, E. Tashiro, M. Ikeda and K. Arakawa

433 Comparison of parathyroid hormone and calcitonin on rat renal calcium and magnesium transport
S. L. Carney

439 Captopril magnifies the increase in angiotensin I-converting enzyme in rats with aminonucleoside nephrosis
J. Pedraza-Chaverri, A. H. Maciel, C. Cruz and J. C. Peña

447 Bronchodilator activity and pharmacokinetics of new xanthines in guinea-pigs
K. Takagi, T. Hasegawa, M. Nadai, R. Sakai and K. Miyamoto

457 Modelling of frequency-dependent effects of lignocaine homologues on the maximum upstroke velocity of action potentials in guinea-pig papillary muscles
T. Hamamoto, M. Ichiyama, Y. Takahashi and T. Ban

469 Letter to the Editor

470 Erratum

NUMBER 7, JULY

471 Influence of workload on the antihypertensive effect of exercise
M. Matsusaki, M. Ikeda, E. Tashiro, M. Koga, S. Miura, M. Ideishi, H. Tanaka, M. Shindo and K. Arakawa

481 A comparison of guanfacine, bunazosin, atenolol and nadolol on blood pressure and plasma noradrenaline responses to cold pressor testing
M. Koshiji, H. Ito, S. Minatoguchi, H. Watanabe, Y. Imai, M. Kakami and S. Hirakawa

489 Effects of acute superior cervical ganglionectomy on cerebral blood flow and metabolism in stroke-prone spontaneously hypertensive rats subjected to cerebral ischaemia
T. Nagao, S. Sadoshima, T. Ishitsuka, K. Kusuda, O. Shiokawa, S. Ibayashi and M. Fujishima

495 The effect of ovine prolactin on the epididymal sialic acid concentration in male rats
R. Gautam and B. M. J. Pereira

503 The effect of graded haemorrhage on erythropoietin production in the immature ovine foetus
K. M. Moritz and E. M. Wintour

509 Platelet-activating factor in bronchoalveolar lavage fluid of patients with adult respiratory distress syndrome
K. Matsumoto, F. Taki, Y. Kondoh, H. Taniguchi and K. Takagi

517 Comparative effects of dopamine and dobutamine on the pulmonary haemodynamic response to hypoxia in dogs ventilated with a hypoxic gas mixture
H. Tanaka, K. Tajimi, T. Kasai and K. Kobayashi

523 Inhibition of nitric oxide synthase specifically enhances adrenergic vasoconstriction in rabbits
Z-Y. Du, G. J. Dusting and O. L. Woodman

Short Communications

531 Presynaptic α_2-adrenoreceptor-mediated modulation of norepinephrine release from vascular adrenergic neurons in reduced renal mass salt hypertensive rats
K. Tsuda, K. Kimura, H. Shima, I. Nishio and Y. Masuyama

537 Ageing has no effect on the volume density of hepatocytes, reticulo-endothelial cells or the extracellular space in livers of female Sprague-Dawley rats
G. Martin, R. B. Sewell, N. D. Yeomans and R. A. Smallwood

NUMBER 6, AUGUST

541 Nerve growth factor mRNA content parallels altered sympathetic innervation in the spontaneously hypertensive rat
P. H. Falckh, L. A. Harkin and R. J. Head

547 Circulating angiotensin II levels under repeated administration of lisinopril in normal subjects
M. Kawamura, M. Imanishi, Y. Matsushima, K. Ito and K. Hiramori

555 Interaction of the non-steroidal anti-inflammatory drug flufenamic acid with gastric acid secretion and H^+/K^+-ATPase
W. Beil, C. Greite and K-F. Sewing

563 Plasma adenosine concentrations are elevated in conscious spontaneously hypertensive rats
K. Yamada, A. Goto, M. Ishii, M. Yoshioka, H. Matsuoka and T. Sugimoto

569 Effects of chronic administration of antihypertensive drugs on vasodilation mediated by calcitonin gene-related peptide-containing vasodilator nerves in spontaneously hypertensive rats
H. Kawasaki

575 Effects of arginine vasopressin, angiotensin II and endothelin-1 on the release of brain natriuretic peptide *in vivo* and *in vitro*
T. Horio, M. Kohno and T. Takeda

583 Dietary N^G-nitro-L-arginine induces sustained hypertension in normotensive Wistar-Kyoto rats
K. Ikeda, O. G. Gutierrez Jr and Y. Yamori

587 Characterization of the baroreceptor heart rate reflex during development in spontaneously hypertensive rats
G. A. Head and M. A. Adams

Short Communication

599 Xanthines inhibit human platelet aggregation induced by platelet-activating factor
N. L. A. Misso and P. J. Thompson

NUMBER 9, SEPTEMBER

603 A study of serum prolactin levels in schizophrenia: Comparison of males and females
A. Kuruvilla, J. Peedicayil, G. Srikrishna, K. Kuruvilla and A. S. Kanagasabathy

607 Atrial natriuretic peptide in pregnancy: Response to oral sodium supplementation
S. A. Lowe, G. J. Macdonald and M. A. Brown

613 Studies on the effect of dopamine on the human platelet response
G. Anfossi, P. Massucco, E. Mularoni, F. Cavalot, S. Burzacca, L. Mattiello and M. Trovati

619 L-Arginine infusion induces hypotension and diuresis/natriuresis with concomitant increased urinary excretion of nitrate/nitrite and cyclic GMP in humans
K. Kanno, Y. Hirata, T. Emori, K. Ohta, S. Eguchi, T. Imai and F. Marumo

627 Responsiveness and sensitivity to cholinergic agonists and antagonists in bovine isolated bronchial muscle
M. G. Matera, M. Cazzolo, M. Constantino, D. De Santis and F. Rossi

631 Prejunctional actions of tacrine on autonomic neuroeffector transmission in rabbit isolated pulmonary artery and rat isolated atria
M. E. Fabiani, P. Kabo and D. F. Story

645 Intracoronary PGE_2 and veratrine inhibits renin release in conscious dogs via chemosensitive ventricular afferents
A. J. Gorman. J-S. Chen, S. Foster, R. G. Snyder and S. G. Iams

Short Communications

657 Does the haemodynamic response to acute central hypovolaemia depend on the rate of fall of cardiac output?
R. G. Evans, I. P. Hayes and J. Ludbrook

663 Enhancement by endothelin-1 of the release of catecholamines from the canine adrenal gland in response to splanchnic nerve stimulation
A. Takeuchi, T. Kimura and S. Satoh

NUMBER 10, OCTOBER

667 Origin of urinary epidermal growth factor in humans: Excretion of endogenous EGF and infused [^{131}I]-human EGF and kidney histochemistry
A. Lev-Ran, D. L. Hwang, J. Ben-Ezra and L. E. Williams

675 Inhibition of NO synthesis has an additive effect on hypertension induced by ACTH in conscious rats
M. Li, G. J. Dusting and J. A. Whitworth

683 Endothelin-3-induced microvascular incompetence and mitochondrial damage in rat myocardium
L. Maxwell, K. Pratt and J. Gavin

689 Arachidonic acid metabolism in nicotine-treated rats and nicotine-incubated rabbit aortic smooth muscle cells
S-C. G. Hui, Z. Wang, H. Zhang and C. W. Ogle

695 Angiotensin-converting enzyme inhibition causes deterioration in renal function in one-kidney Goldblatt hypertensive rats with and without renal arterial stenosis
W-C. Huang, J-N. Wu and J-S. Jin

705 Response of plasma renin–angiotensin system to a single captopril administration in patients receiving long-term treatment with captopril
T. Iwata, Y. Dazai, Y. Kitami, S. Muneta, Y. Imamura, E. Murakami and K. Hiwada

711 *In vivo* and *in vitro* effects of atrial natriuretic peptide on renin release
T. Ishimitsu, Y. Hirata, H. Matsuoka, M. Ishii, T. Sugimoto, K. Kangawa and H. Matsuo

717 Mechanism and prevention of chronic colonic inflammation with trinitrobenzene sulfonic acid in rats
H. Hoshino, S. Sugiyama, A. Ohara, H. Goto, Y. Tsukamoto and T. Ozawa

723 Different biventricular remodelling of myosin and collagen in pulmonary hypertension
S. Ishikawa, M. Honda, S. Yamada, Y. Goto, S. Morioka, Y. Ishinaga, Y. Murakami, S. Masumara and K. Moriyama

NUMBER 11, NOVEMBER

733 Review
Bradycardia during reversible hypovolaemic shock: Associated neural reflex mechanisms and clinical implications
N. H. Secher, J. Jacobsen, D. B. Friedman and S. Matzen

745 Afferent control of vasopressin and renin release during haemorrhage in normal and autonomically blocked rats
C-A. Courneya, P. I. Korner, J. R. Oliver and R. L. Woods

761 Cardiac β-adrenoreceptor changes in experimental hyperthyroidism in dogs
A. Hoey, L. Brown, C. Marchant, R. Atwell and C. Sernia

767 Arterial baroreflex control of heart period is not related to blood pressure variability in conscious hypertensive and normotensive rats
D-F. Su, C. Cerutti, C. Barrès, C. Julien, M. Vincent, C. Paultre and J. Sassard

777 Effects of 4 weeks endurance training on cardiac left ventricular structure and function
A. M. Dart, I. T. Meredith and G. L. Jennings

785 Epithelial disruption by proteases augments the responsiveness of porcine bronchial segments
T. I. Omari and M. P. Sparrow

NUMBER 12, DECEMBER

795 Potassium accelerates urinary sodium excretion during salt loading without stimulating atrial natriuretic polypeptide secretion
M. Mano, A. Sugawara, Y. Nara, K. Nakao, R. Horie, J. Endo, H. Imura and Y. Yamori

803 Influence of cimetidine on gallamine-induced neuromuscular paralysis in rats
Y. Mishra and I. Ramzan

809 Direct renal effects of endothelin in chronic hypoxic spontaneously hypertensive rats
C. F. Chen, C. T. Chien and M. S. Wu

815 Assessing vascular reactivity of arteries in the small vessel myograph
G. A. McPherson

827 The role of the renal nerves in renin synthesis
Y. Zhang, T. Morgan and G. Read

833 Effects of noise on blood pressure and vascular reactivities
C-C. Wu, S-J. Chen and M-H. Yen

839 Cyclic adenosine 3′,5′-monophosphate content and bronchial smooth muscle contractility of hyper- and hypothyroid lungs
B. M. Nabishah, P. B. Morat, A. K. Alias, B. A. Kadir and B. A. K. Khalid

843 The effects of thyroxine treatment on slow- and fast-contracting skeletal muscle contractions of the cat and their cyclic AMP level
Z. Merican, S. Sukumaran, V. L. Raj, M. H. Rajikin and B. A. K. Khalid

847 **Referees**

849 **Author Index**

SUPPLEMENT 19

High Blood Pressure Research Council of Australia Symposium, 1992
Cardiovascular Remodelling in Hypertension: The Role of the Renin-Angiotensin System and ACE Inhibition

1 The tissue renin–angiotensin system and its functional role
C. I. Johnston, L. M. Burrell, R. Perich, K. Jandeleit and B. Jackson

7 Acute and chronic effects of angiotensin-converting enzyme inhibitors on tissue angiotensin-converting enzyme
S. Y. Chai, R. Perich, B. Jackson, F. A. O. Mendelsohn and C. I. Johnston

13 Effect of perindopril on the development of atherosclerosis in the cholesterol-fed rabbit
J. H. Campbell, P. Fenessy and G. R. Campbell

19 A developmental genetic mechanism involving angiotensin in spontaneously hypertensive rats
S. B. Harrap

23 Diabetic renal microvascular disease: The role of hypertension and ACE inhibitors
M. E. Cooper, J. R. Rumble, T. Gin and T. Lim-Joon

29 The effect of hypertension and ACE inhibition on arterial structure and compliance
M. E. Safar and B. I. Levy

33 Remodelling of the vascular system in response to hypertension and drug therapy
B. I. Levy and M. E. Safar

39 Enhanced contraction to noradrenaline, serotonin and nerve stimulation but normal endothelium-derived relaxing factor response in skin small arteries in human primary hypertension
J. A. Angus, G. L. Jennings and K. Sudhir

49 The clinical pharmacology of ACE inhibitors: Evidence for clinically relevant differences?
K. R. Lees, I. B. Squire and J. L. Reid

55 Comparison of the pharmacokinetics and pharmacodynamics of perindopril, cilazapril and enalapril
W. J. Louis, E. L. Conway, H. Krum, B. Workman, O. H. Drummer, W. Lam, P. Phillips, L. G. Howes and B. Jackson

61 Clinical efficacy of perindopril in hypertension
T. Morgan and A. Anderson

67 Angiotensin-converting enzyme inhibition as first-line treatment for hypertension
H. Thurston

SUPPLEMENT 20

Proceedings of the Interdisciplinary Symposium on Gene, Nutrition and Health, 1991
Gene-environment Interactions in Cardiovascular Diseases

Genetic factors in cardiovascular diseases

1 Evidence for gene–environmental interactions in Utah families with hypertension, dyslipidaemia and early coronary heart disease
R. Williams, S. C. Hunt, P. N. Hopkins, L. L. Wu, M. C. Schumacher, B. M. Stults, L. Ball, J. Ware, S. J. Hasstedt and J-M. Lalouel

7 Family history study on hypertension in Japan
N. Yasuda, Y. Nara, S-i. Kojima, H. Mikami, K. Hiwada, K. Tsuda, M. Koide and Y. Yamori

11 Membrane fluidity as a genetic marker of hypertension
K. Tsuda, Y. Ueno, I. Nishio and Y. Masuyama

17 Renin gene restriction fragment length polymorphisms in a Japanese family with a high incidence of essential hypertension
T. Okura, Y. Kitami, R. Wakamiya, T. Iwata and K. Hiwada

21 Analysis of the apolipoprotein B3′ hypervariable region in patients with essential hypertension
K. Higashimori, J. Higaki, T. Miki, A. Kamitani, H. Mikami, Y. Kumahara and T. Ogihara

Environmental factors in cardiovascular diseases

Review Article

25 Salt and hypertension: revisited
F. O. Simpson

29 Experimental studies on cardiovascular disorders and cellular Ca handling in shell-less chick embryos
M. Koide, M. Iwase, M. Yokota and R. S. Tuan

33 Analysis of factors in hypertension: Change of membrane fluidity in the arteries of spontaneously hypertensive and monocrotaline-injected rats
M. Takeshita, S. Yoshida, M. Miyata and H. Yoshida

37 The role of oxidized lipoproteins in the pathogenesis of atherosclerosis
T. Kita, M. Yokode, K. Ishii, N. Kume, Y. Nagano, H. Arai, H. Otani, Y. Ueda and S. Hara

Gene–environment interaction in cardiovascular diseases

43 Gene–environment interaction in hypertension, stroke and atherosclerosis in experimental models and supportive findings from a world-wide cross-sectional epidemiological survey: A WHO-cardiac study
Y. Yamori, Y. Nara, S. Mizushima, S. Murakami, K. Ikeda, M. Sawamura, T. Nabika and R. Horie

53 Abnormal *hsp70* gene expression: Its potential key role in metabolic defects in hypertension
P. Hamet

61 The association between salt sensitivity of blood pressure and family history of hypertension
K. Murakami, S-i. Kojima, G. Kimura, T. Sanai, K. Yoshida, M. Imanishi, H. Abe, M. Kawamura, Y. Kawano, T. Ashida, H. Yoshimi, M. Kuramochi and T. Omae

65 Ethnic differences in salt sensitivity: Genetic or environmental factors?
J. P. Mtabaji, Y. Moriguchi, Y. Nara, S. Mizushima, M. Mano and Y. Yamori

69 Quantitative analysis of the tracking of blood pressure and relative factors in childhood: Shimane Heart Study
C. Mori, K. Watanabe, N. Haneda, Y. Harada, Z. W. Zhong and T. Nishio
